

Free Mobile Betting Apps

Mobile betting has been called the newest revolution in online betting, and with reason; it's the fastest and most convenient way to place a bet.

Mobile gambling has been around since the early 2000, but its safe to say that its phenomenal growth can be attributed to better internet technology and today's new generation of smart phones.

In fact the latest research from IHS Screen Digest in the UK shows that mobile betting activity has increased dramatically this year. More than half of UK punters are now accessing betting services through their phones, and Australian's are not far behind.

With the introduction of Apple and Android-powered smart phones, Sportingbet has adapted their online betting platform so that customers can transact and place bets via their phones on anything from the footy finals to the Spring Carnival and more.

The secret to mobile betting is how good the apps are. The apps (short for applications) are special software that work together with other software. Sportingbet has created an app that has seamless integration with the betting platform but optimised for a mobile phone's screen resolution (320 x 480 to 640 x 960 for the iPhone and 320 x 240 for the Android).

All it takes is a web-enabled phone and [Sportingbet's mobile betting account](#) to start placing bets. There are various types of mobile betting apps depending on your smart phone's operating system. Sportingbet provides iPhone/iPad and Android compatible apps. The best part is that these apps are free.

Now betting fans can bet on their favourite sport or horse race by taking advantage of the free mobile betting apps from Sportingbet - [register here](#).
